SUMMARY

Data analytics enthusiast with hands-on experience in Python-based ETL pipelines, exploratory data analysis, and interactive dashboard development using Tableau and Google Sheets. Pursuing B.Tech in AI with a strong foundation in data visualization, statistical analysis, and storytelling through data. Proven ability to transform raw datasets into actionable insights across domains including food delivery, short-term rentals, and more.

EXPERIENCE

AI Automation & Data Intern

Mar 2025 – Present

Elan Exports

- Building AI-powered automation pipelines and intelligent agents to streamline export operations and internal workflows
- Developing data extraction and processing systems using Python to enable real-time decision-making at scale
- Integrating AI tools and APIs into production systems, automating repetitive business processes and reducing manual effort significantly

PROJECTS

Swiggy Food Orders Data Analytics & Visualization | *Python, Pandas, Tableau, ETL* GitHub | Tableau Dashboard

- Analyzed 91,788 cleaned order records from January to August 2025 across 28 Indian cities to uncover pricing, rating, and demand trends
- Built a fully automated Python ETL pipeline (extraction → cleaning → EDA → statistical analysis → final load) across five modular notebooks
- Designed an interactive two-view Tableau dashboard — Executive Overview and Segmentation view — enabling exploration by city, price tier, and time period

Multi-City Airbnb Host Strategy & Revenue Optimization | *Google Sheets, Excel, EDA, Dashboard* GitHub

- Analyzed 10,000+ Airbnb listings across multiple U.S. cities to identify key drivers of revenue and occupancy
- Engineered KPIs including Average Price, Occupancy Rate, Estimated Annual Revenue, Revenue per Available Day, and Host Performance Score
- Built an interactive Excel dashboard supporting host segmentation, room type performance analysis, and city-level revenue distribution

UFO Sightings — Exploratory Data Analysis & Visualization | *Python, Pandas, Tableau* GitHub | Tableau Dashboard

- Performed end-to-end data cleaning and exploratory analysis on a historical UFO sightings dataset using Python and Pandas
- Identified geographic hotspots, temporal trends, and notable sighting patterns through statistical exploration
- Designed an interactive Tableau dashboard visualizing sighting frequency by location, year, and shape for intuitive storytelling

EDUCATION

Newton School of Technology, Rishihood University

2024 – 2028

B.Tech in Artificial Intelligence

SKILLS

Data Visualization: Tableau, Google Sheets Dashboard, Excel (Pivot Tables, Charts), Matplotlib, Seaborn

Data Analytics & EDA: Python, Pandas, NumPy, Statistical Analysis, KPI Development, Data Storytelling

ETL & Data Engineering: Python ETL Pipelines, Data Cleaning, Data Transformation, REST APIs, Firebase Firestore

Databases: MongoDB, MySQL

AI & Automation: LLM Integration, Gemini API, Groq API, AI Agents, Agentic Workflows

Tools & DevOps: Git, GitHub, Vercel, CLI, Jupyter Notebook

CERTIFICATIONS

Software Engineering Job Simulation – Goldman Sachs (Forage), Dec 2024

Completed real-world engineering simulation covering code review, security analysis, and software best practices.
